

NET into stock pricing: IDW2

Joe Wallace – Van Meter

Leo Gould – Lutron Electronics

Van Meter : Benefits

- DISK/CD price updates went away. Huge time savings. Data became real time.
- A.P. invoice problems went away. Data is now sync up.
- What I had to do to receive NET pricing thru IDW2.

Lutron: Benefits

- Eliminates Manual Processing
- Improved Data Synchronization
- Provides a common repository for the data through the IDW2
- Applications created provide the engine to supply this information to other applications

Lutron: How we did it

- Researched how our pricing was calculated internally in our system
- IDEA provided the table layout to upload to IDW2
- Identified distributor to work with (Van Meter)
- Developed applications based initially on existing apps used to create pricing disks/CDs

Lutron: How we did it

- Worked with IDEA and Van Meter to test applications and the upload process using Van Meter's pricing.
- Tested, Tested & Tested.....
- Put application into production for Van Meter only.
- Scheduled to run weekly

Lutron: How we did it

- Needed to automate the process
- Make setup of other distributors as easy as possible for quick turnaround time.
- Add a few more distributors and monitor applications closely for accuracy
- Move ahead and add distributors as requested.
